TEMPERATURE PROBE A038

Alltec's Temperature Probe A038 is suitable for measuring temperature in indoor, outdoor, aggressive local rooms, refrigerators, and others, due to its IP65 protection class (NBR 6146, DIN 40050, and IEC529).

The cover and box are made of aluminum (G Al Si 12/DIN 1775), and exterior with gray powder coating. (RAL 7032). The closure is made with stainless steel screws and neoprene rubber seal. The temperature measurement range is from -40 to 100 °C (-40 to 212 ° F) with an uncertainty of ± 2 ° C (± 3.6 ° F).

Technical specs:

Sensor:	3-wire PT-100
Measurement range:	-40 a 100 °C (-40 to 212 ° F)
Precision:	± 2 °C (± 3.6 ° F)
Isolation:	1500VAC@60s
Cable gland:	PG9 or 1/2" Seal tube
Protection class:	IP-65

Electrical connection:
